

Standardized Operating Procedures (CSOP) for CSAR

[For the F.Y. 2023-24]

Our policies, controls, and procedures are delivered the strake/IR procedure automation and reporting platform, in addition to security plans that can also be presented in Microsoft Office-based documentation that we can edit for our specific needs. Our CSOP provides the following:

- Each standard within the Information Security Programs (ISP), the CSOP has a procedure associated with it.
- The CSOP addresses the "how?" since procedures provide the means for how our organization's policies and standards are actually implemented.
- The CSOP provides the underlying cyber security procedures that must be documented, as many stipulated by statutory, regulatory and contractual requirements.
- The procedure statements in the CSOP can be exported into other repositories or left in a single document. There is no wrong answer for how procedures are maintained.
